

FOOTWEAR DISTRIBUTORS AND RETAILERS OF AMERICA

Comprehensive Product Safety Program

Global Footwear Physical and Chemical Testing Digital Guidebook

Confused about navigating the countless RSLs not focused on footwear? FDRA and TUV SUD have developed the only footwear specific RSL and physical testing guidebook for the industry. They have also developed an online program that allows professionals to search and select chemicals to get clear information on product safety regulations by country and/or state.

Product Safety Intelligence

- Instant updates and alerts on new regulations and their targets
- In-depth documents and memos explaining and analyzing product safety regulations
- Access to FDRA's intelligence center which hosts a product safety document archive

Special Training Programs

Each year FDRA hosts several Product Safety and Environment (PSE) workshops around the globe where experts and government officials educate the industry on trends and new regulations. FDRA members receive a large discount on registration.

FDRA also hosts webinars for the industry when there is a need to go deeper on technical details related to product safety regulations or trends.

Product safety standards are constantly changing. FDRA members are always prepared. Are you?

FDRA PS Working Group

Members have the ability to join FDRA's product safety working group, which boasts more than 75 of the industry's leading experts from over 50 companies.

The working group allows the industry to discuss best practices with each other on conference calls and provides a platform for the industry to unite and address safety regulations.

Access to the Leading Industry Experts

FDRA partners with a number of product safety legal experts and testing labs - providing FDRA members with the best consultations and advice available to the footwear industry.

FDRA is the largest and only U.S. footwear association focused solely on footwear issues, like product safety. Email info@fdra.org for more information on how FDRA can help you.
