## RECYCLED HYBRID EVA

# DYNAMIC FOAM

### OUR PROCESS

LOCAL FARMERS USE  
A POLYOLEFIN/EVA  
FILM TO COVER  
GREENHOUSES.

THE FILM GETS  
STRIPPED,  
CLEANED, AND ROLLED  
INTO SHEETS.

THE SHEETS ARE  
THEN MELTED  
DOWN TO A LIQUID  
STATE.

AN EXTRUDER IS USED TO  
PELLETIZE A FINISHED  
PRODUCT FOR MOLDING.
