

An aerial photograph of a dense forest with a winding dirt road. The trees are mostly green, with some showing yellow and orange autumn colors. The road is a light brown color and curves through the forest. The text 'solum' is overlaid in white, with a trademark symbol (TM) to its right. Below the text is a horizontal line of seven orange dots of varying sizes.

solumTM

step with purpose

BioTread™ Technology

The World's first regenerative outsole

Content

90% biological ingredients

40% recycled plant-waste

0% plastics or petroleum

Features

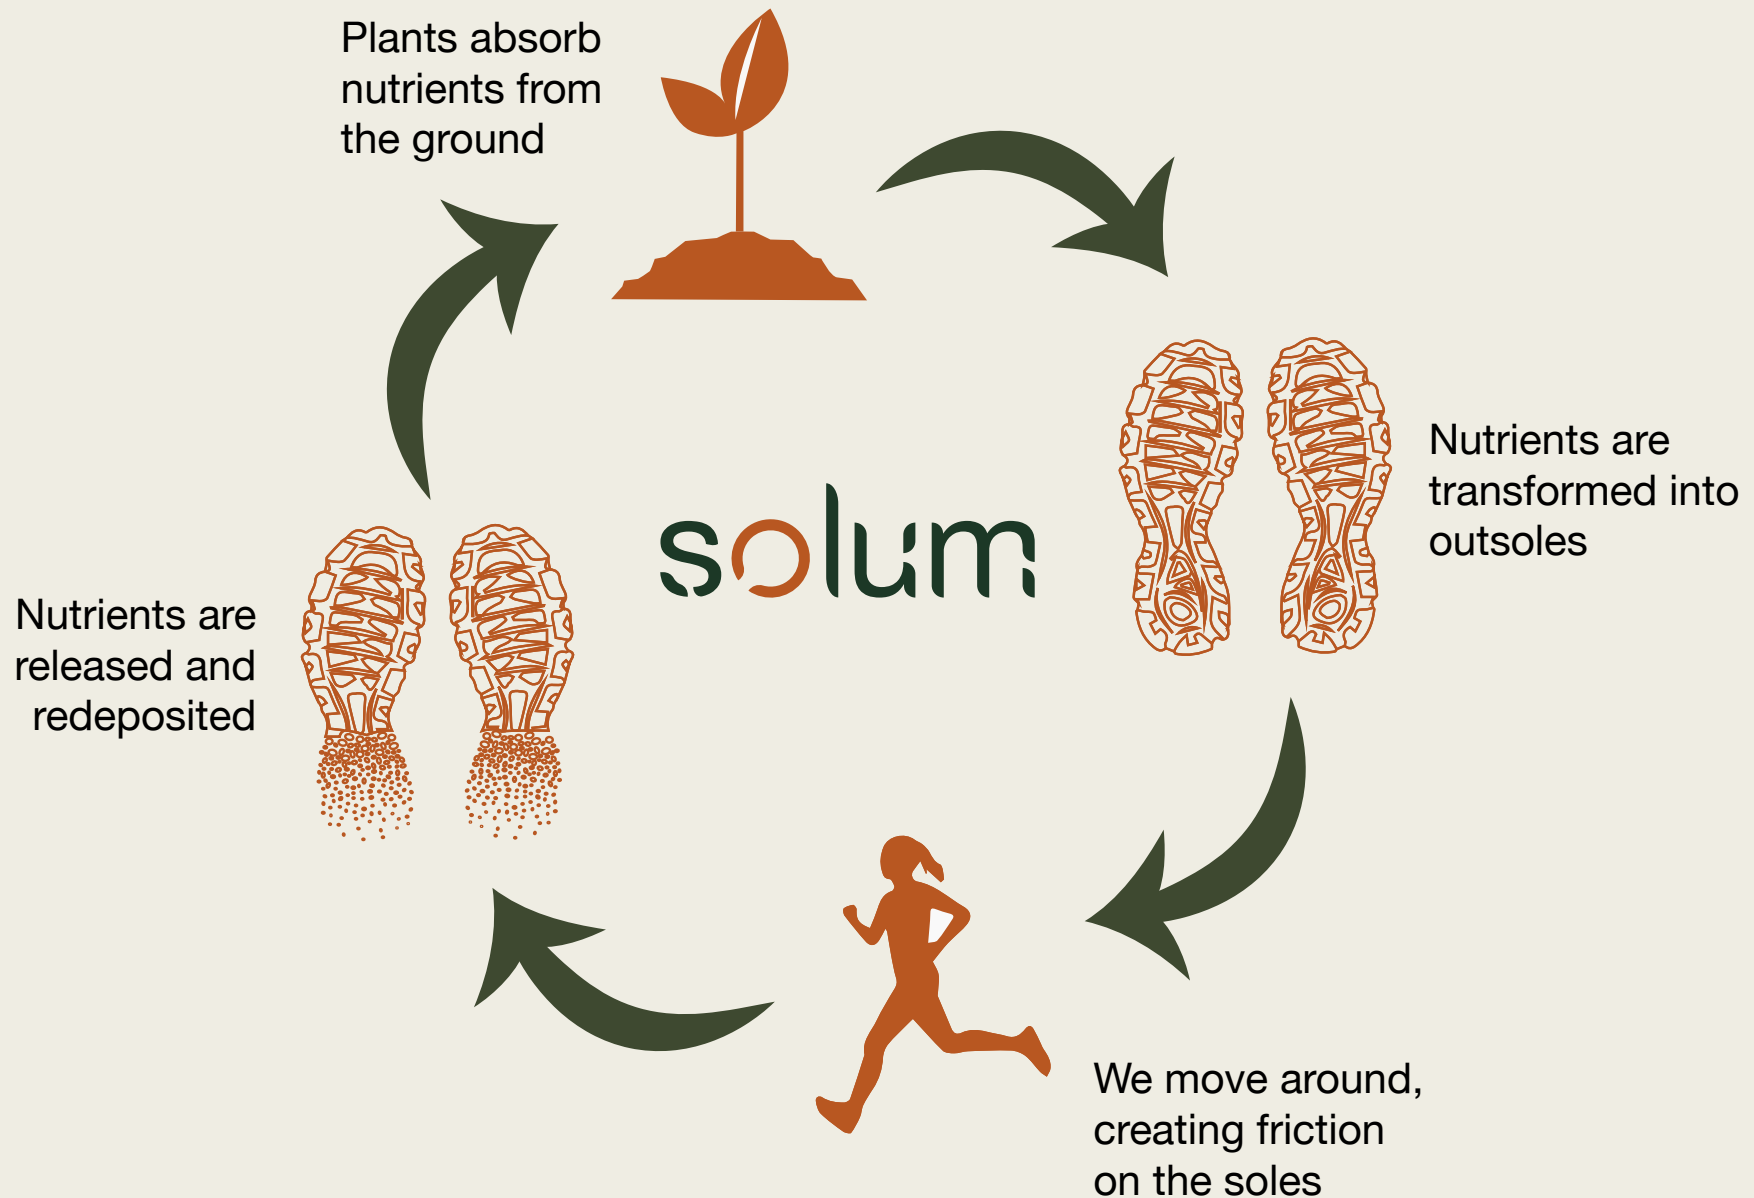

High Performance. Through principles of bio-mimicry, we harness the strength nature to be strength in product.

Circular. As the product is used and breaks-down over time, it returns positive nutrients into the environment.

Our Circular Lifecycle

Solum has a goal of reaching **40 million pairs** by 2026,
equating to **2 billion grams** of nutrients redeposited
into the ecosystem.

This is enough nutrients to cover half of the the length of the
Continental Divide Trail in Colorado with **1cm of top soil.**
